InkJet Transfer Paper Application

This special paper allows you to transfer your image onto black or any other dark and white textile. Textile should be heat resistant. If the garment is prone to shrinking when washed, then pre-wash it before application.

Preparation and ironing

- Switch your iron to the highest setting (approx. 160°C) and preheat. Do not use steam.

A. Place a smooth cloth (for example kitchen towels or a folded pillowcase) between the T-shirt and a solid surface such as table top.

B. Cut out the image, the transfer paper will leave white background.

C. Remove the backing paper off the print carrier (thin silicon layer with the image) and place the image face up onto the fabric which should be wrinkle free (pre-ironed).

D. Now place the bundled ironing protection paper onto the image. Iron the image through this protective paper by applying consistent moderate pressure distributing the heat evenly.

E. Concentrate on using the center of the iron on all the edges of the image. Apply heat for up to 20 seconds (1/2 page images) and 50 seconds for larger sizes.

F. After picture cooled down, peel off the protective paper in 45 degree angle from one corner using firm and steady tension.

- To transfer more than one image onto both sides of a fabric: first iron all images onto the T-shirt but do not remove the protective papers. Finally when all images are cooled remove protective papers.
- A heat press can also be used. Set the temperature to 160°C and press for approx. 10-15 seconds.
- If any parts came loose, you can reapply them onto the garment by ironing loose parts through protective paper (baking paper can be used instead).

Washing

- Machine wash fabrics at max 40°C, the garment turned inside out. Do not bleach. Do not use a tumble dryer. Do not hand wash, the picture does not withstand rubbing.
- When ironing after washing, protect the image with paper (preferably kitchen baking paper).

For your safety

- Follow the manufacturer's instructions when using an iron.
- Children should only use textile transfer papers under adult supervision.
